29: Major problems and concerns (control problems, social/political/economic concerns or impacts, etc.) Relate critical resources needs identified above to the Incident Action Plan. <b>Deep organic soils continue to burn due to long term drying. ERC, BI and KBDI indices all are setting new maximums and 100 hr &amp; 1000 hr fuels are at historic lows.</b>

32: Today's observed fire behavior (leave blank for non-fire events):

**Brief torching in the tall brush. Smoldering and creeping in the timber litter.**

33: Significant events today (closures, evacuations, significant progress made, etc.):

**Continue clearing snags that have fallen across the fireline in Division F to open that road to fire traffic. Utilize helicopter and tractor plows to secure and extinguish hotspots along fire perimeter.**

39: For fire incidents, describe resistance to control in terms of:

1. Growth Potential - **Medium**

2. Difficulty of Terrain - **High**

40: Given the current constraints, when will the chosen management strategy succeed?

**Unknown at this time.**

41: Projected demobilization start date: **07/04/2011 0800**

42: Remarks:

**Supporting Simmons Road fire with resources. Also ordering IR for Pains Bay and Blueberry Farm fires on an as requested basis. Snags falling across firelines due to burning organic soils are hindering contain/control objectives.**
